Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

H--exporting ATPase (EC 3.6.3.6) chain PMP1 - yeast (Saccharomyces cerevisiae)
NyAlternate names: plasma membrane proteolipid PMP1; protein YCR024c-a
C;Species: Saccharomyces cerevisiae
C;Species: Saccharomyces cerevisiae
C;Species: Saccharomyces cerevisiae
C;Accession: S31269; S22591
R;Navarre, C.; Ghislain, M.; Leterme, S.; Ferroud, C.; Dufour, J.P.; Goffeau, A.
J. Biol. Chem. 267, 6425-6428, 1992
A;Tille: Purification and complete sequence of a small proteolipid associated with the p.
A;Reference number: S31269; MUID:92210627; PMID:1532582
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    R;Navarre, C.; Catty, P.; Leterme, S.; Dietrich, F.; Goffeau, A.

"Antibacterial and antifungal properties of alpha-helical, cationic peptides in the venom of scorpions from southern Africa.";

Bur. J. Blochem. 269:4799-4810(2002).

--- FUNCTION: Induces a leak current in voltage-clamped dorsal root ganglion cells of rate by forming pores. Degranulates human granulocytes and has a weak hemolytic activity against human red blood cells. Has antibacterial activity against human red bacteria but is less active against Gram-negative bacteria.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      SEQUENCE FROM N.A.

Submitted (DEC-1997) to the EMBL/GenBank/DDBJ databases.
-!- SIMILARITY: Belongs to the ribosomal protein L41e family.
                    -!- SIMILARITY: Belongs to the ribosomal protein 141e family.
